# Straumann<sup>®</sup> CARES<sup>®</sup> Screw Retained Bars for Straumann<sup>®</sup> Pro Arch

## CARES® BARS FOR IMMEDIATE FIXED FULL ARCH CASES

There are many approaches to a fixed, screw-retained hybrid solution. Each patient's desired functional and esthetic result may differ; the restorative team needs flexible solutions to accommodate the anatomical situation and the preferred final restoration. Straumann CARES labs offer multiple bar types. Different design profiles and tools modify the geometry of the bar for the desired functional and esthetic result.

# CARES® BASIC FIXED BAR FOR FULL ACRYLIC WRAP AROUND – 3 PROFILES AVAILABLE

Lambda Profile

Trapezoid Profile

CARES<sup>®</sup> labs can create retention elements for complete or partial acrylic wrap around. Four control points at each corner allow the CDT to change the size, position and/or orientation of the geometry.

# CARES® ADVANCED FIXED BARS FOR PARTIAL ACRYLIC WRAP AROUND - WITH ORAL METAL BACKING

**Staircase Retention:** Five control points allow CARES labs to modify the geometry for the desired functional and esthetic results. Two control points are available for the Staircase Retention Rail; one control point for the Acrylic finishing line; and two control points for the oral metal backing.

10 years. Original quality. CARES bars are covered under The Straumann Guarantee<sup>®</sup>, which provides 10 years coverage for metal bars, bridges and abutments.

#### **CARES® MILLED BAR FOR OVERDENTURES**

Machined threads accept LOCATOR<sup>®</sup> with M2 threads. CARES labs can change the geometry for the wall taper to allow the bar to accept vertical and lateral forces.

LOCATOR® available from Straumann separately
